Department of Computer Science & Engineering

Vision

To produce computer manpower in Holistic Education for Growth and Prosperity

Mission

M1.   To provide best possible educational facilities for imparting research-centric education in Engineering Technology.

M2.   To create ambient environment in promoting robust industry-academia connect with life-long learning.

M3.   To organize conferences, seminars and hands on training programs to create a workforce that is "Professional and Ethical" in computer science & engineering

M4.   To encourage the students to become self-motivated, to take up responsibility and develop full human potential sensitive towards society and nature.

Program Educational Objectives (PEOs)

PEO1. To produce graduates with research centric education who can compete in robust industry-academia environment.

PEO2. To impart computer science based engineering education through which students develop professional leadership, ethical skills for employability and entrepreneurship.

PEO3. To enable lifelong learning among students who can face global challenges in multidisciplinary environment, society and nature.
